# Billing Statements and Invoices

---

## Introduction

An invoice for services provided within UNMC are called "billing statements." Traditional invoices are only sent to core facility customers who are not internal to UNMC.

Core facilities use an automated process for billing that is completed once a month for the previous month. For example, services rendered and billed in May will be processed and posted in SAP in June. All charges are posted directly into SAP based on the cost object provided at the time of service.

The principal investigator being billed for services will receive an email from each core when billing is completed for that month.

Core facilities cannot make billing changes due to a cost object that was incorrectly provided by the customer. Should a charge need to be moved to a different account, contact your department's accounting administrator to initiate a journal transfer.

---

## View/Print Billing Statements

To view or print billing statements or invoices, access the "CORE" tab in the RSS. Under "Billing," select "Billing Statements Dashboard."

The bottom of each billing statement has core-specific contact information if you have questions about the services that were billed.

## Administrator Billing Statement Access

By default, only those with a role in the service may access billing statements. However, there are a number of instances where a lab manager or administrator may need documentation for ledger transactions. This can be accessed through the Administrator Dashboard.
